100% CONFIDENCE IN ROOM LAYOUT

CADwalk™ is a large-scale live visualization studio that allows a team to walk through 1:1 scale construction plans and perform real-time interactions to optimize and validate the design. This enables a significant improvement in visual understanding and stakeholder acceptance.

CADwalk™ proves that a perfect final design can be achieved **80% faster and 50% cheaper** through interactive real-time planning compared to traditional approaches for the planning of control centers and control rooms. Each CADwalk studio is equipped with a virtual reality headset for further validation.

ACHIEVE THE RESULT OF MONTHS OF PLANNING AND DECISION MAKING

AFTER ONLY ONE DAY CADWALK WORKSHOP

CADwalk’s patented visualization studio allows teams to walk through CAD room plans at any scale, including 1:1 full-scale. By improving visual understanding, CADwalk successfully involves all stakeholders from management to the operational level in the design process. The involvement of the affected employees ensures 100% confidence in the final design.

Users can make changes to the design and layout in real-time using CADwalk’s unique tracking technology. This allows objects in space to be moved immediately for quick option testing, layout optimization and workflow planning.

CADwalk’s visual, hands-on approach to collaborative design and intuitive decision making is the key to a perfect final design that is 80% faster and 50% less expensive than traditional approaches to design development.

HOW IT WORKS:

1. First concept sketches

2. Test the ideas and drafts with all participants

3. Ergonomic studies and validation with CADwalk ergonomic Virtual Reality

4. Final floor plan
